## The Garden That is *Different*

**W**HY different? *Different* in that the plants you purchase here are not deprived of the soil upon which their roots are feeding and packed in a foreign substance, that they may be carried by railroad to struggle back to life as best they can; *different* in that the plants you procure, whether sent you by truck or purchased on the grounds, have not been sitting out on parade to suffer and await your rescue, but are growing happily in the soil, only at your choosing to be lifted and moved with the least disturbance possible.

Our Garden is *different* too in that we ourselves meet you and help you in selecting the plants you desire. Also we are glad to give you the advantage of our experience in growing the more difficult varieties and to assist you freely in your garden planning. When orders are received by phone or mail, none is filled that does not receive our personal supervision.

Gardening with us is a veritable joy, to be shared with all who come. In glancing over an article published in *Real Gardening* we find so well expressed our own creed—that which makes our Garden *different*—that we transcribe it here: “The gardener working quietly among his plants learns not only the secrets of the growing things he tends, but the very secret of life itself. All that he puts into it the earth returns to him a hundredfold: patience and perseverance, humor and humility, wisdom and faith and hope.”
